### **Class 3 School Sow and Grow Wheat Competition**

The Grains and Fodder Committee of the Royal Agricultural & Horticultural Society of South Australia (RAHS) is pleased to invite all South Australian schools to participate in the 2025 Royal Adelaide Show School Sow and Grow Wheat Competition. This competition promotes the science behind agronomy to students, teachers and parents, with the goal for students to collaborate and develop a project that grows the most vigorous wheat plants in a pot.

#### **AIMS OF THE COMPETITION**

The School Sow and Grow Wheat Competition aims to:

- Give students an insight into the science of growing wheat
- Allow students to compete in a curriculum-linked trial that provides insights in the requirements for growing a crop

- Offer students practical, hands-on insight to the future employment opportunities with crop production and agronomy
- Provide students with the opportunity to compete with other schools at the Royal Adelaide Show
- Encourage school participation and progression into grain judging competitions and crop growing

### COMPETITION COMPONENTS

The 2025 Royal Adelaide Show Sow and Grow Wheat Competition will run at your school before the 2025 Royal Adelaide Show and culminate at the Show by exhibiting a pot of wheat plants.

The Competition is judged by industry experts and consists of two (2) MANDATORY components:

- Presentation of Exhibit: A pot of a minimum of four (4) growing plants. The plants are judged on uniformity and vigour, both above ground and root components
- Project component: Students must create a poster detailing information about the wheat growing and evaluation of the project. The poster is A2 size and will be on display for the duration of the Show.

Students can enter the competition individually or as a team containing a maximum of 3 students per group. Each pot represents one entry. It is recommended you only enter one pot per team.

Individuals or teams must deliver their pot of wheat and their A2 poster to the Golden Grains Pavillion at the Adelaide Showground in person at 9.30am on Monday 1<sup>st</sup> September 2025.

## PROJECT OUTLINE

### SEEDS

Students can source wheat seeds from local farmers or pet/feed suppliers.

Sourced wheat seeds **must not** be treated with any grain protectant.

### POTS

Pots must be 14 litres in volume. This rule is extremely important, and any larger or smaller pot sizes will be disqualified. Suitable 300mm standard, 14 litre pots can be obtained from your local garden supplier or hardware store. (Old pots can be used but must be cleaned thoroughly for your project.)

Soil choice is a student decision. It may be soil from a school garden, students' home, a farm paddock or even washed sand. It is recommended to take soil from the upper 30 cm of a site and your choice of soil and reasons be documented in your report.

### DO NOT USE POTTING MIX

Pots **must be placed on** a plastic pot saucer to avoid root growth escaping beyond the pot.

### GROWING CONDITIONS

It is recommended that you sow seeds approximately 10cm apart and sow 2 or 3 seeds per planting hole to improve your chance of germination. If more than one seedling does germinate and emerges in a planting hole you can then pinch out any excess seedlings if you wish.

### You must grow a minimum of 4 plants per pot

Planting (sowing) can occur anytime on or after the first day of term 2 in South Australia i.e. April 29, 2025.

Note: If your crop fails during the growing period, you can replant your pots.

To plant, you will need to supply the following:

- 14 litre pot, (black plastic 300mm)
- Local soil
- fertiliser and water
- protective mask, gloves and watering can.

Entrants can experiment with the following growing condition variables to achieve the most vigorous growth.

- wheat variety,
- seed sowing technique
- light,
- water,
- fertiliser.

**NOTE: YOU MUST NOT USE ANY OF THE FOLLOWING CHEMICALS IN THIS PROJECT – HERBICIDES, INSECTICIDES, FUNGICIDES, NEMATICIDES OR PLANT HORMONES.**

Remember any treatment you decide to try to get the best plant vigour should be done to the whole pot, (not to individual plants in the pot) and be clearly documented in your report. For example,

- variety – all seeds in your pot must be the same variety
- Water – if you choose a particular watering procedure or water type, all plants must receive the same watering.

## RECORDING

Each team or entrant must keep a record of the treatments they use on the potted plants, growth of their plants and present their photos, observations, measurements and evaluation on an A2 size poster. Growth measurement can be done using criteria such as:

- Germination rate
- time from sowing to emergence of seedlings
- time from sowing to reach significant growth stages
- height of plants
- Tiller numbers
- Leaf numbers

These experimental criteria suggested are simply a guide, students are free to make other measurements.

## REPORTING

Entrants should include the following in the A2 poster report (see judging rubric for further details):

- Title
- Description of the trial (how you ran the trial to achieve most vigorous growth)
- Tables of data recorded and appropriate graphs of measurements
- Photos of each major stage of plant growth and the trial
- Evaluation of plant growth and conditions
- Recommendations to improve the crop growth
- Links to the wheat industry
- Name(s) of entrant(s) and school

## DELIVERY OF PROJECT

Both your pot of plants and your A2 Report must be delivered to Golden Grains Pavillion at the Adelaide Showground on Monday 1<sup>st</sup> September at 9.30am. Your project will be judged between 10 – 11.30am. You are required to be with your project for the whole time of judging and for a short period after judging, when prizes and awards will be presented.

## GENERAL JUDGING CRITERIA

- Condition and vigour of all plants in the trial
- Examination of one plant for vigour of roots and foliage.
- Project description, evaluation and presentation of results
- Informal oral presentation by entrant(s) on judging day and QA responses.

### Class 4 Schools Crop Competition
