SCHOOL WHEAT & GROWING COMPETITION

‘SOW AND GROW’

KEY DATES

Entries close: Friday 13 June 2025

Competition growing week commences: Monday 29 April 2025

Growing period: 18 weeks

Competition growing week concludes: Friday 29 August 2025

Delivery: Monday 1st September - 9.30am to 9.45am

Judging and Presentation: Monday 1st September - 10am – 11.30am

INTRODUCTION

This competition promotes the science behind agronomy to students, teachers and parents. The purpose of the competition is to inspire current students to become the next generation of plant and agricultural scientists, and to support teachers to deliver their science curriculum in a plant-based context.

This competition can be either:

- A school team project (maximum of 3 students) or
- An individual with their school's permission

One entry consists of:

- 1 pot of growing plants
- 1 A2 size poster summarising your project

The goal for each entrant is to grow the most vigorous crop of wheat plants in a pot.

COMPETITION RULES:

ELIGIBLE ENTRANTS

Open to students in years 5 - 10 within Australia.

Students can enter the competition individually or as a team containing a maximum of 3 students per group. Each pot represents one entry. It is recommended you only enter one pot per team.

You can enter as a school project or independently, i.e. a project you do entirely on your own or with parental help. If you enter independently, advise your school Science or Agriculture teacher of your intention.

Individuals or teams must deliver their pot of wheat and their A2 poster to the Golden Grains Pavillion at the Adelaide Showground in person at 9.30am on Monday 1st September 2025.

SEEDS

Students can source wheat seeds from local farmers or pet/feed suppliers.

Planting can occur anytime on or after the first day of term 2 in South Australia i.e. April 29, 2025.

Note: If your crop fails during the time frame, you can replant your pots.

You must grow a minimum of 4 plants per pot

To plant, you will need to supply the following:

- 14 litre pot, (black plastic 300mm)
- potting mix, (NOT SOIL)
- fertiliser and water
- protective mask and watering can.

POTS

Pots must be 14 litres in volume. This rule is extremely important, and any larger or smaller pot sizes will be disqualified. Suitable 300mm standard, 14 litre pots can be obtained from your local garden supplier or hardware store. (Old pots can be used but must be cleaned thoroughly for your project.)

Pots **must not** be placed directly on soil and should be placed on an impervious surface such as concrete. The plant roots should not escape the pot, and a plastic saucer may be used to avoid this.

Photos submitted with the project must show the plant in its original growing pot and growing medium.

GROWING CONDITIONS

It is recommended that you sow 2 or 3 seeds per planting hole to improve your chance of germination. If more than one seedling does germinate and emerges in a planting hole you can then pinch out any excess seedlings if you wish.

Each team or entrant is free to choose where and how the plant is grown within the limits of:

- pot size
- solid potting media
- competition rules.

Entrants can experiment with the following growing condition variables to achieve the most vigorous growth.

- wheat variety,
- light,
- water,
- fertiliser.

NOTE: YOU MUST NOT USE ANY OF THE FOLLOWING CHEMICALS IN THIS PROJECT – HERBICIDES, INSECTICIDES, FUNGICIDES, NEMATICIDES OR PLANT HORMONES.

Remember any treatment you decide to trial to get the best plant vigour should be done to the whole pot, (not to individual plants in the pot) and be clearly documented in your report. For example,

1. variety – all seeds in your pot must be the same variety
2. Water – if you choose a particular watering procedure or water type, all plants must receive the same watering.

RECORDING

Each team or entrant must keep a record of the growth of their plants and present their photos, observations and measurements on an A2 size poster or equivalent. Growth measurement can be done using criteria such as:

- time from sowing to emergence of seedlings
- time from sowing to reach significant growth stages
- height of plants
- Tiller numbers
- Leaf numbers

These experimental criteria suggested are simply a guide, feel free to make other measurements.

REPORTING

Entrants should include the following in the A2 poster report:

- Title
- Description of the trial (how you ran the trial to achieve most vigorous growth)
- Journal of all activities in the trial.
- Tables of data recorded and appropriate graphs of measurements
- Photos of each major stage of plant growth and the trial
- Brief description of issues encountered which affected the growth of the wheat plants
- Name(s) of entrant(s) and contact details.

DELIVERY OF PROJECT

Both your pot of plants and your A2 Report must be delivered to Golden Grains Pavillion at the Adelaide Showground on Monday 1st September before 9.45am. Your project will be judged between 10 – 11.30am. You are required to be with your project for the whole time of judging and for a short period after judging, when prizes and awards will be presented.

JUDGING CRITERIA

- Condition and vigour of all plants in the trial
- Examination of one plant for vigour of roots and foliage.
- Description, journal and presentation of results
- Oral presentation by entrant(s) on judging day and QA responses.

Handy tips to assist you through your wheat growing journey.
